

# TUTORIAL

# INTRODUCTION AND OVERVIEW

# 1. DEFINITION OF SYSTEM UNDER STUDY

## 2. TYPE OF APPLICATION SCENARIO

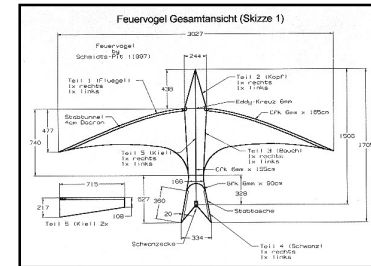

### ► Representation Characteristic

*“Models as a representation of natural or artificial originals, that again can be models.” [translated]*

### ► Abstraction Characteristic

*“Models in general do not capture all attributes of the represented original, but only those that seem relevant to the modeller or model user.” [translated]*

### ► Pragmatic Characteristic

*Models meet their substitution function for specific subjects, within a pre-determined time interval and with limitations on defined intellectual and/or real operations. [translated]*

### 3. INTRODUCTION OF TERMS

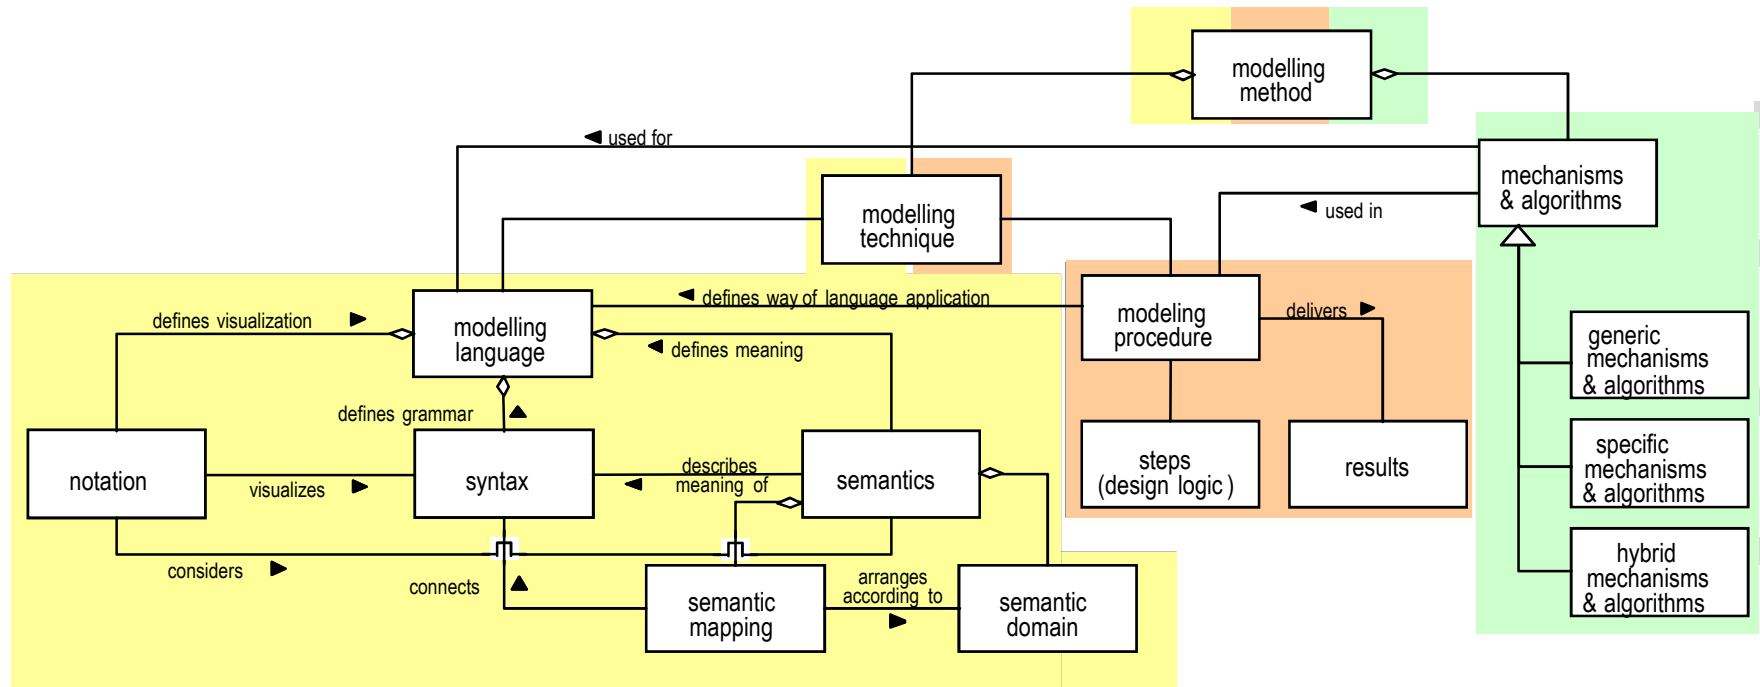

- ▶ **Modelling Language:**  
Modelling constructs (object types) and their relations (relation types) to each other to declare a model.
- ▶ **Metamodel:**  
The model of the syntax of the modelling language
- ▶ **Meta<sup>2</sup> Model:**  
Model of abstract syntax of a language to describe meta models.
- ▶ **Modelling Technique:**  
A modelling language and proceeding instructions for creation of a model in this modelling language.
- ▶ **Mechanisms und Algorithms:**  
Provision of functionalities to process models such as manipulation, visualisation, query, transformation or simulation depending on the modelling language and modelling procedure.

**“Requirement Analysis needs a framework and a procedure to identify requirements for modelling methods in a systematic and transparent way.”**

# GENERIC MODELLING METHOD FRAMEWORK

Reference: Karagiannis, D., Kühn, H.: „Metamodelling Platforms“. In Bauknecht, K., Min Tjoa, A., Quirchmayer, G. (Eds.): Proceedings of the Third International Conference EC-Web 2002 – Dexa 2002, Aix-en-Provence, France, September 2002, LNCS 2455, Springer, Berlin/Heidelberg, p. 182 ff.

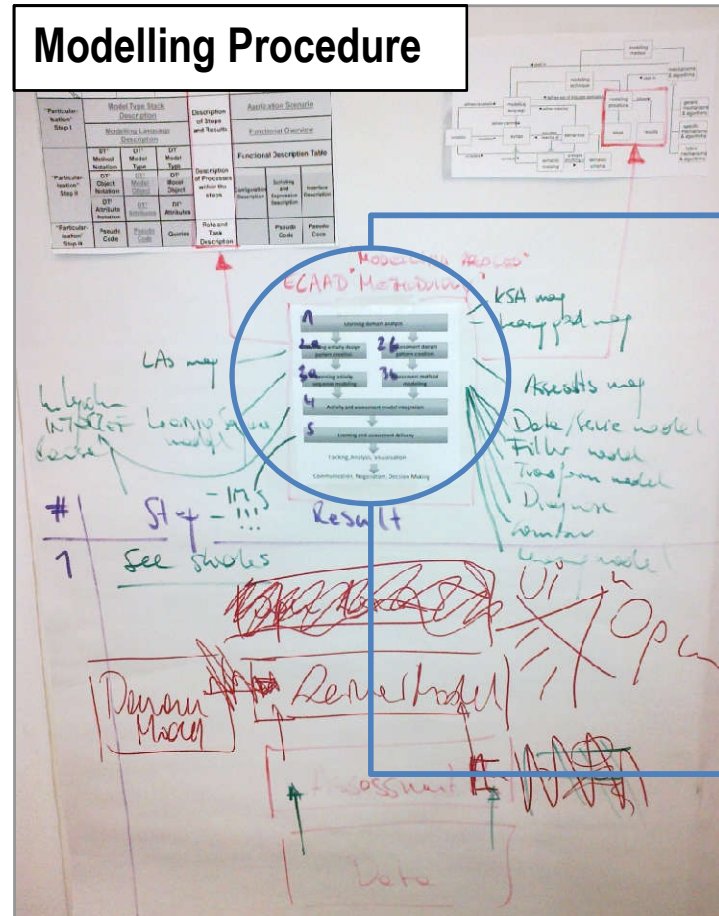

## How to support modelling procedure in an optimal way?

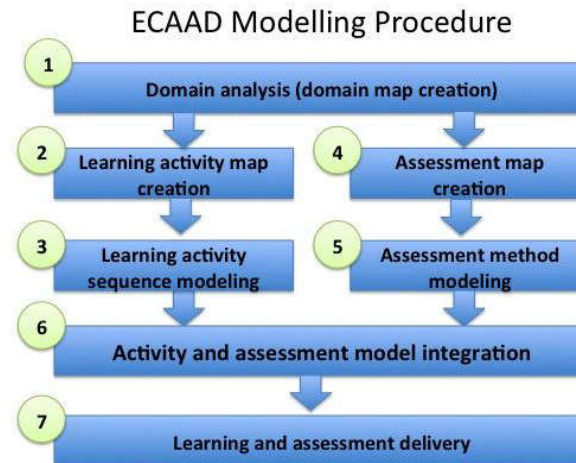

# MODELLING PROCEDURE AS STARTING POINT

**Example: ECAAD** (Evidence-Centered Activity and Assessment Design) from eLearning Domain

## Overview of Modelling Language

## Overview of Mechanisms & Algorithms

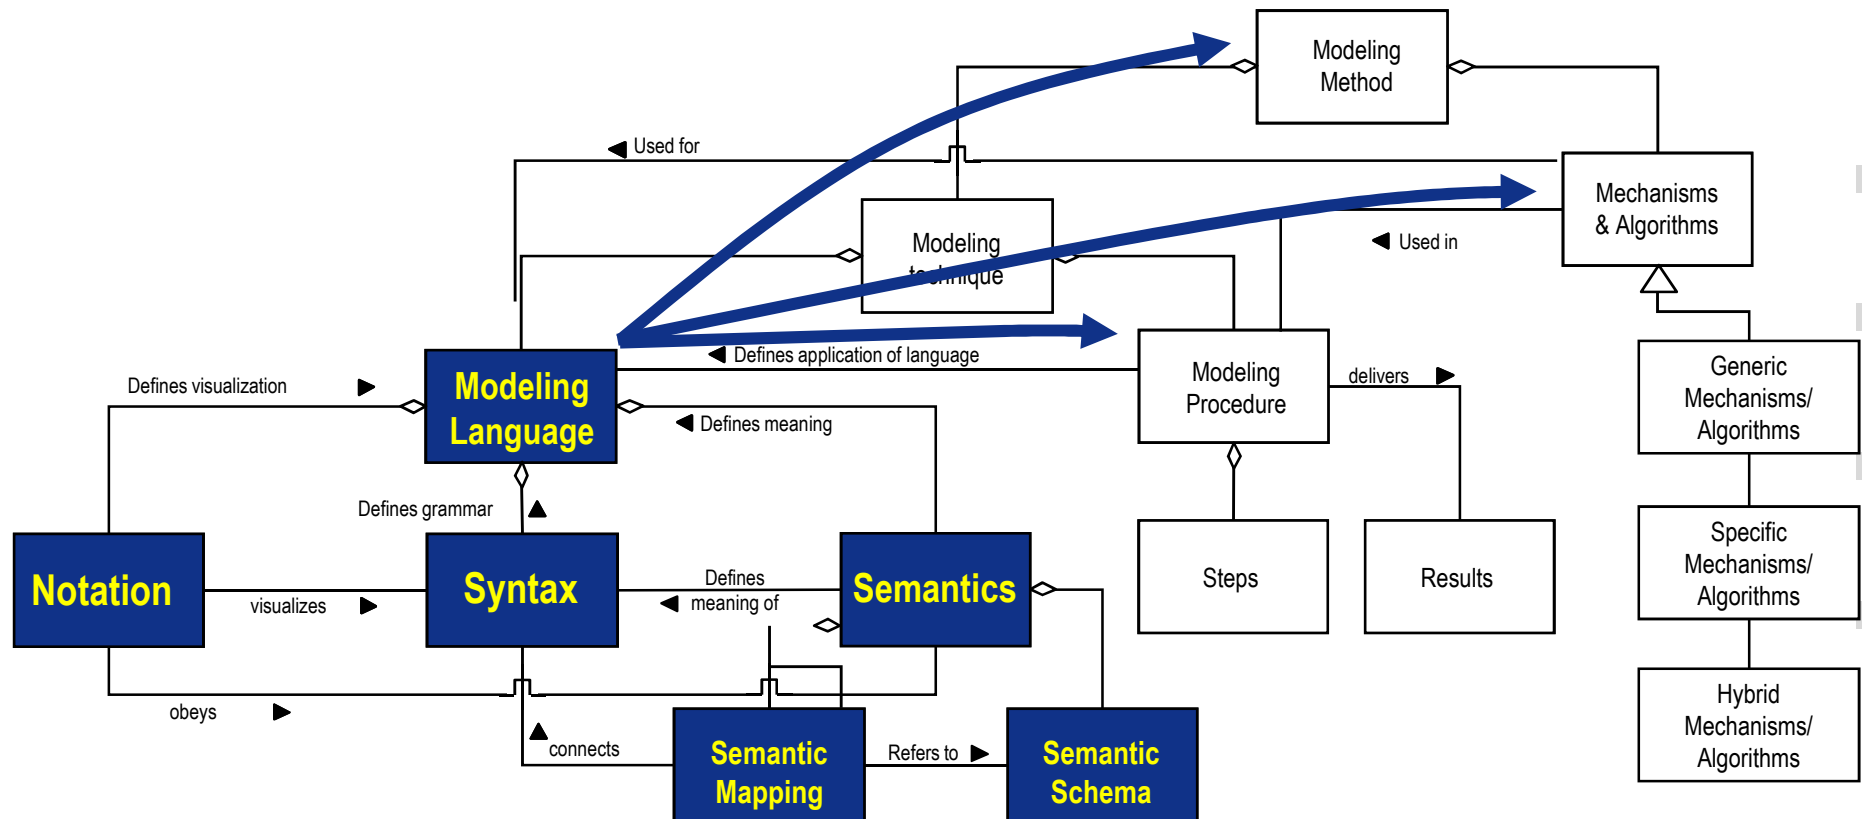

- Assessments, Tracking, Visualisation
- Transformation, Integration of Data
- Diagnose, Communication, Negotiation
- Export into student learning system

# MODELLING LANGUAGE AS STARTING POINT

What concepts are required and how do they behave?

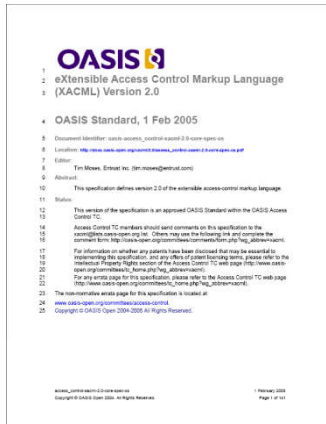

# MODELLING PROCEDURE AS STARTING POINT

Example: MoSeS4eGov (Model-based Security System for eGovernment) from eGovernment domain

## XACML as Conceptual Basis

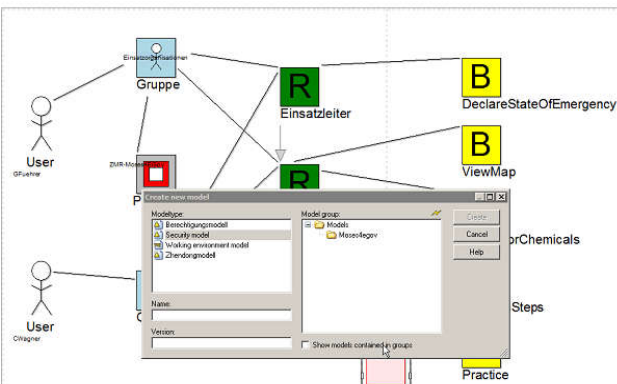

[docs.oasis-open.org/xacml/2.0/access\\_control-xacml-2.0-core-spec-os.pdf](https://docs.oasis-open.org/xacml/2.0/access_control-xacml-2.0-core-spec-os.pdf)

## Modelling Method Overview

Modelling Language

## Implementation of „SECTINO“

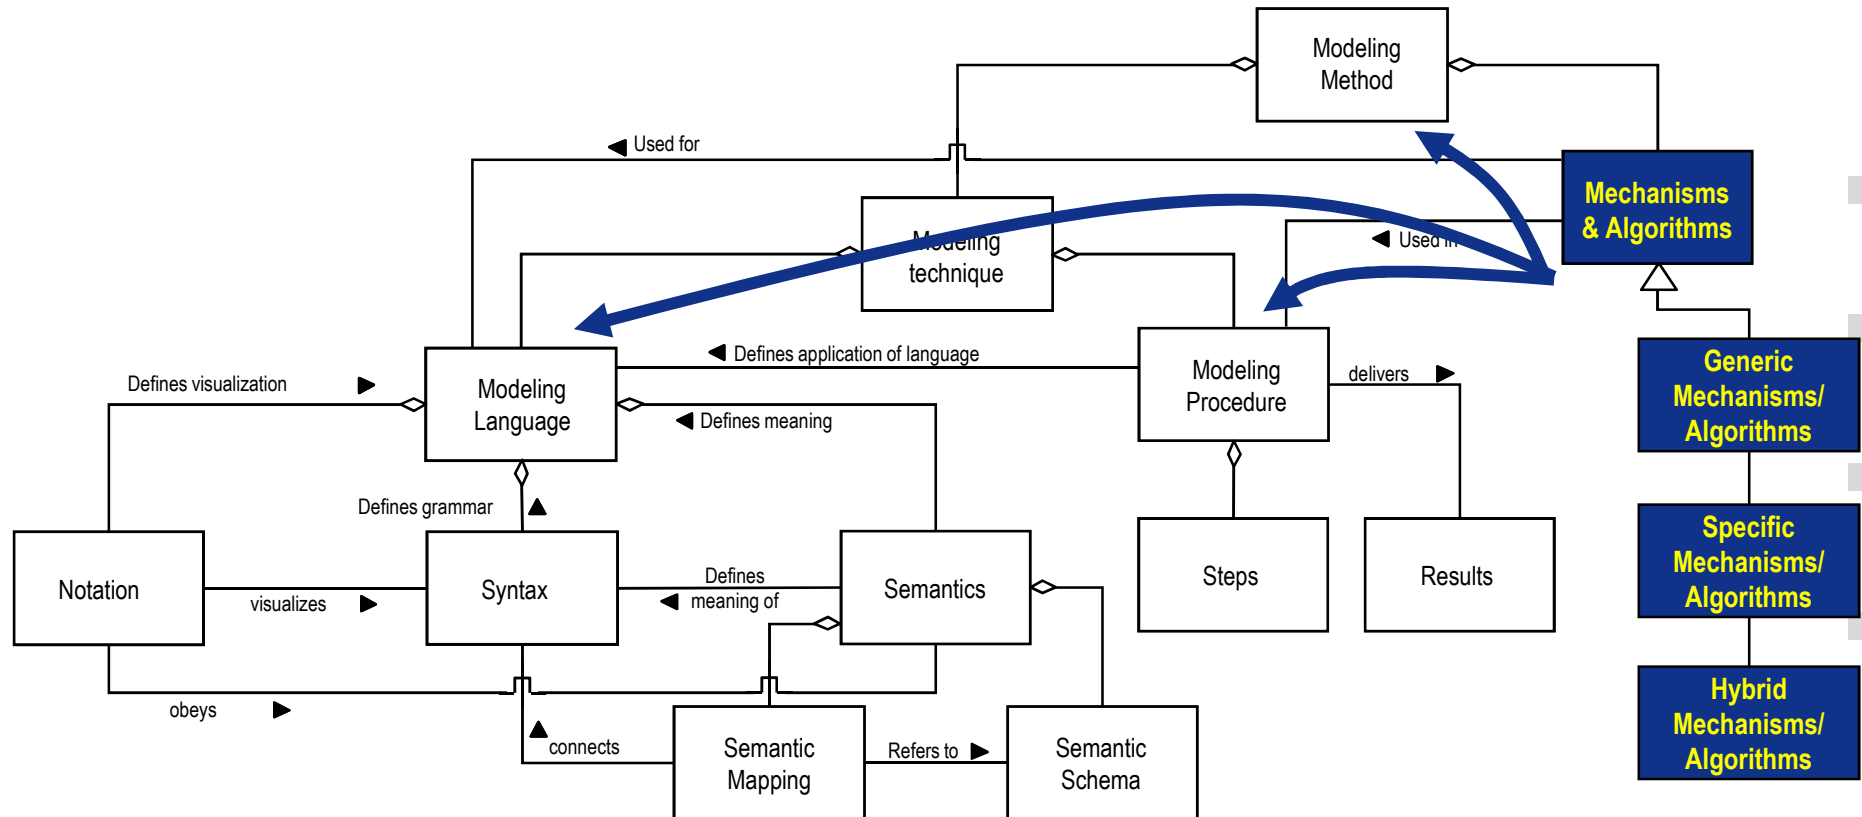

[www.openmodels.at/web/moses4egov/blog](http://www.openmodels.at/web/moses4egov/blog)

Modelling Procedure

Mechanisms & Algorithms

## Which functionality is required and how are models expected to be used.

# FROM BOOK TO MOVIE: A METAPHOR

## Screen Play

- Dialogs
- Interactions
- Scenery
- Effects
- ...

**Writing**

**Shooting**

**Cutting**

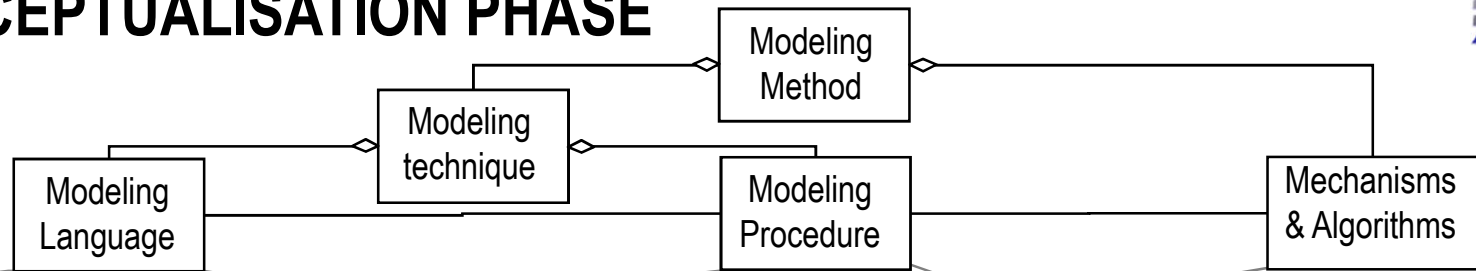

## WHAT IS THE ANALOGUE FOR MODELLING METHODS ?

**Conceptuali  
sation**

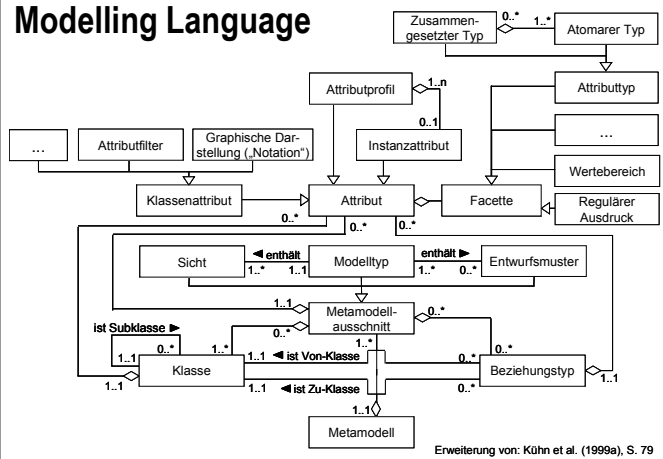

**Implementation**

**Deployment  
and Tooling**
